Students transferring to SIUC should complete PLB 200, CHEM 140A, CHEM 140b, and MATH 110 or 140 before coming to SIUC. These courses are prerequisites to forestry courses and must be taken in the first two years to avoid delays in graduation. Students are strongly encouraged to call or visit the Department of Forestry to discuss courses that will prepare them for the course of study in forestry. This should be done before their first year at a community college.

The baccalaureate oriented associate degree (typically Associate in Arts or Associate in Science) satisfies University Core Curriculum (UCC) requirements for graduation. UCC Coursework required for the BS in FOR is not automatically waived by these associate degree programs.

Questions regarding approved substitutions for required courses for BS in FOR should be directed to:
