2005	2,315	67.4%	54.5%						
2006	2,222	69.8%							

NOTES: Percents are cumulative rather than annual percents.

Each graduation year contains all recorded graduations of students in a given cohort during December, May, and August.

Each cohort consists of all new full-time freshmen entering SIUC in the respective summer and continuing in to fall or entering in that fall semester for the first time. On-campus only degree-seeking students are included in each cohort.

All 10th-day cohorts were tracked through Fall Semester 2007, and the status of the student is recorded before each fall semester following the fall semester as a new freshman: did the student graduate, is the student still persisting, or is the student a non-persister.

Continued to 2nd Year, 3rd Year, etc. is defined as a student who returns for the Fall semester of that year.

The cohort headcount for new, full-time freshmen will not match Fact Book Table 2 because Table 2 includes associate degree-seeking and off-campus students as well as baccalaureate degree-seeking students.
